5. Prepare a précis of the following passage and explain the different steps involved:

There is an enemy beneath our feet—an enemy more deadly for his complete impartiality. He recognizes no national boundaries, and no political parties. Everyone in the world is threatened by him. The enemy is the Earth itself. When an earthquake strike, the world trembles. The power of a quake is greater than anything man himself can produce.

But today scientists are directing a great deal of their effort into finding some way of combating earthquakes and, perhaps at some time shortly, mankind will have discovered a means of protecting itself from earthquakes. An earthquake strikes without warning. When it does, its power is immense. If it strikes a modern city, the damage it causes is as great as if it has struck a primitive village. Gas mains burst, explosions are caused and fires are started. Underground railways are wrecked. Buildings collapse, bridges fall, dams burst and gaping crevices appear in busy streets.

If the quake strikes at sea, huge tidal waves sweep inland. If it strikes mountain regions, avalanches roar down into the valley. Consider the terrifying statistics from the past 1755: Lisbon, capital of Portugal—the city was destroyed entirely and 450 killed; 1970: Peru—50,000 killed. In 1968, an earthquake struck Alaska. As this is a relatively unpopulated part, only a few people were killed. But this likely was one of the most powerful quakes ever to have hit the world.

Geologists estimate that during the tremors, the whole of the state moved over 80 feet farther west into the Pacific Ocean. Imagine the power of something that can move an entire subcontinent! This is the problem that scientists face. They are dealing with forces so immense that man cannot hope to resist them. All that can be done is to try to pinpoint just where the earthquake will strike and work from there. At least some precautionary measures can then be taken to save lives and some property.(https://englishluv.com/examples-of-precis-writing/#google_vignette)
